Arcadia Ballroom

Conference & Banqueting

This beautiful and elegant venue is approached via a sweeping marble staircase, leading to a dramatic pre-assembly area boasting a chequered marble floor, vaulted ceilings, columned spaces, en-suite bar and dramatic double-height windows opening onto the alfresco Balcony Terrace. The double volume Ballroom itself is characterized by elegant chandeliers, mirrored arched doors and a working fireplace of dramatic proportions.

The standard screen configuration includes either a 2.4m x 1.8m(8' x 6') permanent wall mounted screen with a corporate black border or alternatively a 3.0m x 2.3m(10' x 7') fast fold screen centered to the venue set-up with a lectern off center. This configuration can be altered to incorporate two 3.0m x 2.3m(10' x 7') screens. The podium can be used as a static docking station for a laptop which includes a goose neck microphone, power outlet, VGA com port projector connection and can be operated by means of remote clicker mouse or by a technician.

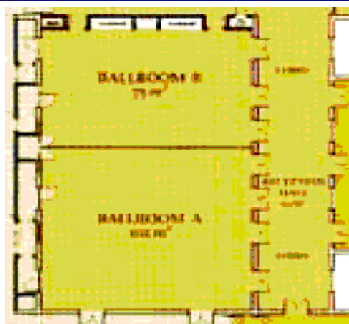

The Arcadia Ballroom has a semi-permanent AV installation with all wiring for the public address and projection systems embedded in the venue. There is a permanent microphone or PC audio feed for the podium and both of the venues speakers are wall mounted. Coupled with a ceiling mounted projector, this venue has surrounding aesthetics and technical professionalism. A comfort monitor of either 19 or 42inch can also be installed. The AV set-up can be run on a dedicated uninterrupted power supply.

With just under 180 square meters to work with, the Arcadia Ballroom presents some unique opportunities to install an integrated stage set. All of our sets are custom designed and built to your specifications incorporating screens of any size and integrated set and stage lighting with company branding or logo's. The Arcadia also allows for the possibility of using long throw projection for more versatility with the floor plan. The possibilities are endless!
