Imbizo

Conference & Banqueting

With a range of venue options available on two spacious levels, equipped with state-of-the-art audio-visual and presentation aids, the centre is ideally placed to host functions large and small. Thanks to the highly flexible, modular nature of its venues, the centre caters for large theatre style presentations, conferences and product launches, 'sit-down' functions and banquets, as well as smaller meetings or 'break-away' sessions. The Imbizo level is on the lower ground level and offers the same degree of flexibility as the upper level.

The standard screen configuration includes either a 2.4m x 1.8m(8' x 6') fast fold screen centered on one side with a lectern off center or alternatively a 1.8m x 1.23m(6' x 4.5') screen placed on the outer wall with a lectern in the middle. This can be used as a static docking station for a laptop which includes a goose neck microphone, power outlet, VGA com port projector connection and can be operated by means of remote clicker mouse or by a technician.

These venues are ideal for an office set-up including conference calls with both wired and wireless internet connectivity. You may also consider the use of a high volume fax/printer or create a small office network in this cozy, professional environment. A complimentary flip chart with stationary is included in your daily delegates package and you can also opt to have a Zound system installed with an IPOD docking station, built in FM radio and auxiliary audio inputs for PC audio.

Technical Specs

- Room dimensions: 8.5m x 19m
- Un-interrupted power supply.
- Air-conditioning.
- Floor sockets for power and ISDN lines + wireless access.
- 63amp three phase socket.
- Programmable house lights.
