Ballroom

Conference & Banqueting

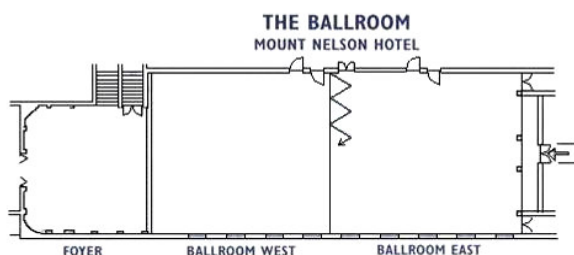

This beautifully refurbished elegant, chandeliered setting is decorated in grand style but also has all the accoutrements necessary for high-tech business functions. It lends itself to wedding receptions, product launches, conferences and exhibitions. The room itself comprises two interconnecting venues and an adjoining Annexe which may all be used in various configurations with a standard AV set-up for each.

The standard screen configuration includes either a 3.7m x 2.7m(12' x 9') fast fold screen centered on one side with a lectern off center or two 3.0m x 2.3m(10' x 7') screens placed on the outer wall with a lectern in the middle. This can be used as a static docking station for a laptop which includes a goose neck microphone, power outlet, VGA com port projector connection and can be operated by means of remote clicker mouse or by a technician. Both sizes have a black mini-set surround that spans from floor to ceiling.

The Ballroom has a semi-permanent AV installation with all wiring for projection, public address and lighting systems imbedded in the venue. With ceiling mounted projectors, profile spots and/or stage lighting it allows for maximum usage of space and an esthetic finish. All four of the venues speakers are wall mounted and can be positioned in any direction. A comfort monitor of either 19 or 42inch can also be installed. The full AV set-up can be run on a dedicated un-interrupted power supply.

With just under 340 square meters to work with the ballroom presents some unique opportunities to install an integrated stage set. All of our sets are custom designed and built to your specifications incorporating screens of any size, utilizing rear projection, integrated set and stage lighting with company branding or logo's. The only limitations are in your imagination!
