Green Park

Green Park Lounge

Located in the Green Park annexe of the hotel, this venue is suited to smaller group functions such as conferences, buffet or working lunches and dinners, cocktail parties, product launches and presentations. The room leads onto a charming outdoor patio and function area, which is perfect for refreshment breaks.

The Green Park's typical sep-up consists of a 2.4m x 1.8m (8x6) Fast-Fold screen set up with a Panasonic projector on a static Karba projector stand. This also allows for accessible power connectivity for everything including your laptop. A complimentary flip chart with stationary is included in your daily delegates package and you can also opt to have a Zound system installed with an IPOD docking station, built in FM radio and auxiliary audio inputs for a mic or PC Audio.

This venue is ideally suited for the use of a standard 42in plasma or LCD screen but can have any size installed. The plasma can be configured to run any feed from a video source to a standard VGA com-port for your laptop. A plasma is perfect for displaying DVD presentations, camera relay and as there is no projection required you can have more free space on the table top. A plasma's is therefore a perfect alternative to the rooms standard set-up.

This venue is ideal for an office set-up including conference calls with both wired and wireless internet connectivity. You may also consider the use of a high volume fax/printer or create a small office network in this cozy, professional environment.
