# Orchid Room

## Conference & Banqueting

The orchid room caters primarily for smaller groups and is popular as a venue for private or business meetings and break away groups, as well as small weddings, lunches and dinners. The venue is situated next to the business centre and being located on the ground floor allows for easy accessibility.

This venue is ideally suited for the use of a standard 42in plasma but can have any size installed. The plasma can be configured to run any feed from a video source to a standard VGA com-port for your laptop. A plasma is perfect for displaying DVD presentations, camera relay or for use with video conferencing and as there is no projection required you can have more free space on the table top. You may also choose the option of an LCD screen as a perfect alternative to the rooms standard set-up.

The Orchid Rooms typical sep-up consists of a 1.8m x 1.35m (6x4.5) fast-fold screen set up with a projector on the table or alternatively a dedicated Karbo stand.

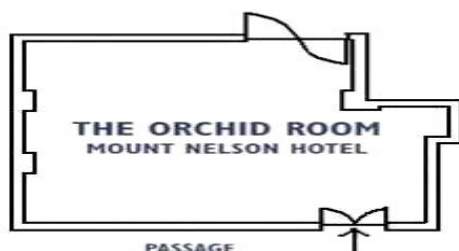

This also allows for accessible power connectivity under the table for everything including your laptop. You can also opt to have a sound system installed with an IPOD docking station, built in FM radio and auxiliary audio inputs for any source including microphones and PC audio..

A complimentary flip chart with stationary and/or a 94cm x 153cm white board on wheels is included in your daily delegates package and can for example be used in tandem with a power point presentation. A clicker mouse can be used to remotely operate any laptop presentation and a laser pointer can be utilized for the utmost professionalism.

### Technical Specs

- Room dimensions: 8.70m x 7.45m x 3.37m.
- Un-interrupted power supply.
- Air-conditioned
- Cabled broadband + wireless access.
- Dimmable house lights.
